Section 1: Maps, 1971-2000

State Normals, 1971-2000 (and previous periods)

HISTORICAL CLIMATOGRAPHY SERIES NO. 4 and 5
Temperature (°F), Precipitation (inches), and Heating and Cooling Degree Days

NOTES

State Normals Maps

Map Descriptions:

Maps showing both mean and standard deviations, by element and by month (or annual value), are provided for the 48 contiguous United States, plus Alaska and Hawaii where available. Puerto Rico, the U.S. Virgin Islands, and Pacific trust territories are not mapped.

Each map page has a description at the bottom of the page indicating the month (or annual period), period of record (either 1971-2000 or 1931-2000), and element (either mean temperature (degrees F), precipitation (inches), and heating and cooling degree days (base 65 degrees F)). The legend to the immediate left of the maps provide data range/color relationships, which correspond to the tabular information presented in this product. Slight variations in color display and printouts between the legend and maps are possible.

Long-term (1931-2000) statistics are not available for Hawaii.

Additional notes on the state normals product can be found on Page 3 of HCS 4-1,2; 5-1,2.

Abbreviations:

HDD=Heating Degree Days

CDD=Cooling Degree Days
